## PRICE GUIDE PRODUCTS AND SERVICES

# INTRODUCTION

Techtra Graphics, IDS, Orbus Haiti provides state-of-the-art grand format printing, full service graphic finishing and graphic services.

Our facilities produce over 3000 square feet of display graphics per hour thanks to a full service customer satisfaction team, talented art staff, and around the clock production crew. Our grand format printers are equipped for speed and quality to meet the most demanding deadlines.

With a fleet of over 8 state-of-the-art printers, we provide our clients with graphics to compliment our line of Orbus hardware display products creating a one-stop-shop for all of your trade show requirements. We specialize in trade show applications such as banner stand graphics, table throws, tension fabric displays and popup graphics, and can print on more than 23 materials.

We look forward to the opportunity of printing your next project. For questions regarding our print materials, capabilities, finishing, artwork guidelines or turnaround times, please contact your sales representative.

The graphics we provide are printed on state-of-the-art equipment.

Our machines helps ensure the production of the highest quality, consistent and accurate color graphics. We specifies the components of an image that define a similar "visual appearance" to the human eye.

## Specifications:

- Defines a color metric definition for gray balance
- Specifies gray balance in the midtones and image contrast from the highlights to the shadows
- Defines the ideal colorimetric black and CMYK gray-tone curves for an image
- Specifies a step-by-step method for calibrating proofing systems and printers to these tone curves

We are proud to be able to provide consistent, high quality graphics with accurate color.

# ARTWORK GUIDELINES

## Acceptable File Formats

Illustrator CC or below  
Photoshop CC or below  
InDesign CC or below (not preferred)

High quality, editable PDFs, Photoshop and Illustrator files are preferred, as they are more suitable applications for large format printing. Art time will be charged if files need to be fixed or altered to meet guidelines. When sending files, please be sure to include all support art (fonts, linked images, etc).

Please note that Illustrator special effects such as glows, transparencies, or drop shadows are not recommended. These effects sometimes have unpredictable results when printing. Photoshop is preferred when using these special effects.

## Font Specifications

Fonts must be converted to outlines. If fonts are not created to outlines, please provide Macintosh or TrueType fonts. If changes need to be made in the file, please provide the fonts and a version of the file with editable type.

## Color Specifications

Please provide all vector files (Illustrator and InDesign) in CMYK format. Please supply all raster artwork (Photoshop files, jpgs, tiffs) in RGB format for the most accurate color output. Please provide a hard copy proof of the files being printed for color accuracy and a PDF layout for file layout accuracy.

If Pantone colors need to be matched please specify on purchase order or hard copy reference. All critical Pantone colors need to be called out in the file as solid coated swatches. If multiple Pantone swatches are used in the file, all will be matched to solid coated unless otherwise specified.

Please feel free to submit catalogs, brochures, printed proofs, etc. to use for a color reference. If color matching is required for Photoshop files please provide a layered file. Art time may be charged to correct flattened Photoshop files.

If color matching to existing graphics, we will need those back to review. Please contact your sales representative.

We guarantee color matching on all hard copy proofs, specified Pantone colors and client supplied hard copy proofs. Orders without indication of Pantone colors, supplied hard copy proofs or requested hard copy proofs are not guaranteed for color.

## Resolution

All raster files (either print files or linked files) must be at 100-120 pixels per inch at 100%.

## Vinyl Cut Graphics

Artwork must be set-up as vector files with fonts created to outlines for all cut vinyl. Please specify Avery color number for solid color vinyl or PMS color for dsg printed and cut vinyl.

## Submitting Artwork Files

Files are accepted via Email (up to 5MB), DVD, CD or File transfer site such as WeTransfer, Hightail or Dropbox.

Files can be locally handled on a USB key

Please Contact your Sales Rep for any other options.

## Murals / Popup Graphics

Mural files must be built as one file. Please note where panel breaks are located and try to minimize the amount of type that crosses over the panel breaks.

## Bleed Specifications

All graphics produced require specific bleeds. Below is a general outline for the required bleeds.

Mural Popup Files - 1/2" bleed around the perimeter.

Hopups™, Formulates™, Vector Frame™ - 2" bleed around the perimeter. Please keep all logos, type, and critical information at least 2" in from the visual edge of the graphic.

Fabric Structures - 5" bleed around the perimeter.

Banner Stand Graphics - each product has specific bleed requirements. Please refer to graphic template for specific information. Different printing processes may require different bleeds. All banner stand graphics printed on Resilience will require an extra 1" bleed around the perimeter.

Custom Dye-Sub Flag Graphics - 2" bleed left & right sides, 4" bleed top & bottom.

Customs Graphics, UV-1/2" bleed around the perimeter.

Customs Fabrics Graphics, 8oz. Resilience - 2" bleed around the perimeter.

Custom Contour Cut UV Graphics - 1/2" bleed around the perimeter.

Custom Dye-Sub Graphics - 2" bleed around the perimeter

Custom Dye-Sub Graphics exceeding 160" - 5" bleed around the perimeter

Templates for products are available online at [www.techtragraphics.com](http://www.techtragraphics.com).

# NOTICE

Effective price communication is essential to help distributors communicate and implement their pricing strategy. The main aim of this guide is to provide answers to the day-to-day problems faced by purchasers when awarding and executing public contracts. It is also a reference document, a compendium of all the regulations applicable to pricing issues, backed up by numerous case law references.

This price guide for digital printing products and services is a valuable resource for both businesses and individuals who are interested in understanding the costs associated with different printing options. By providing detailed information on pricing factors, pricing structures, and average costs for different types of digital printing services, this guide can help users make informed decisions when selecting a printing provider. Whether you are looking to print marketing materials, promotional items, or other printed products, this guide can help you navigate the pricing landscape and find the best value for your printing needs. Thank you for using this price guide, and we hope it has been a helpful tool in your decision-making process.
